**FOR GROWN-UPS**

Ask the big question first and let your child guess — every guess is welcome. Do the activity together, but do not give the answer: ask “What do you see? Why do you think it happened?” Then read the “why” together.

1 This week's big question

Big question: Why do we have two eyes?

हमें दो आँखें क्यों मिली हैं?

Small questions to wonder about:

Why do we blink?

How do our two ears tell us where a sound is coming from?

My guess: Will it be easier to catch a ball with one eye closed, or with both eyes open?

Draw or write what you think will happen

Let's find out: The catching test

You need:

- a soft ball or a rolled-up pair of socks
 - a grown-up to throw it gently
- ☐ 1. Close one eye. A grown-up throws the ball gently five times. Count your catches.
- ☐ 2. Now open both eyes and try five more throws.
- ☐ 3. Colour one box for every catch.

Fill in what you saw:

	1	2	3	4	5
One eye open					
Both eyes open

3

Why did it happen?

- Each eye sees the ball from a slightly different place.
- Your brain puts the two pictures together and works out how far away the ball is.
- That is why catching is easier with both eyes open.

Now tell it to a grown-up in your own words. Was your guess right?

Think and tell

Why do you think we have two ears as well?

How do your eyes help you cross the road safely?

What would be hard to do with your eyes closed?

What did you find out this week?

Was your guess right? Why, or why not?

What new question do you have now?
